

BNBGold

An experimental liquidity-based DeFi token

DISCLAIMER
BNB GOLD/BNBG IS NOT AFFILIATED WITH BINANCE.

BNB Gold

— Introduction

BNB GOLD

BNB Gold is a Proof of Liquidity (PoL) token. This means that at inception, 100% of circulating token supply was sent to Pancakeswap. 9% of every transaction made will be automatically added to Liquidity Pool periodically via our token smart contract.

No more tokens can ever be minted, entailing no special allocation to developers or team members. With BNB Gold fair launch, everyone will have to purchase the token on Pancakeswap — including us.

The BNB Gold will culminate in a flagship Pancakeswap pool managed by a DAO system. There, the trading fees generated can be distributed for token buybacks. Future transactions will cover the NFT marketplace.

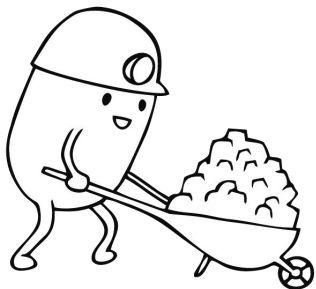

BNB Gold

Token Utility

BNB Goldmine Swap dApp

The **BNB Goldmine** allows holders to manage their portfolios by connecting their wallets to the DApp.

Holders can view daily P&L (Profit & Lost) activities on all holdings and directly link to Pancakeswap for further swapping. They can also swap their BNBG tokens directly on BNBG's website.

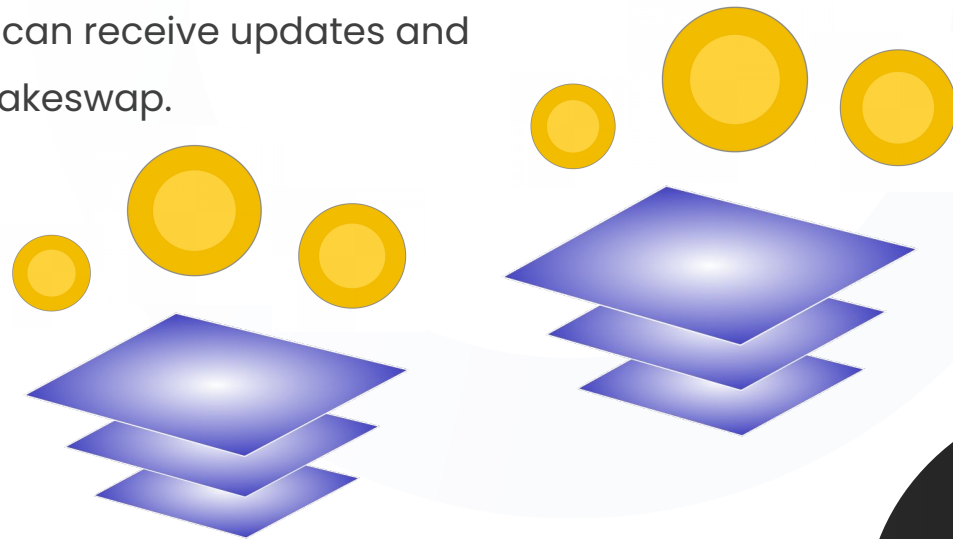

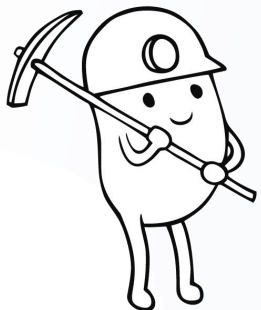

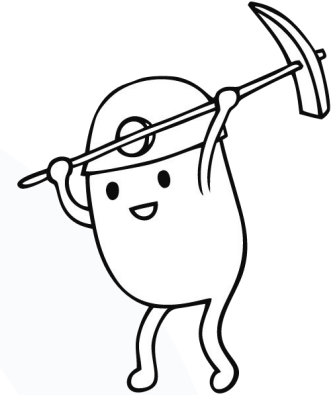

BNB Gold

Token Utility

BNB Gold Staking DApp

BNB Gold holders can stake their holdings for a return of more BNBG tokens. The staking dApp charges a flat fee of 5% per transaction both for staking and unstaking activities, with 100% of all transactions distributed to the staking pool. With this incentive, holders are likely to hold BNBG tokens for the long term.

Additionally, by staking their tokens, holders can receive updates and notifications on new token releases on Pancakeswap.

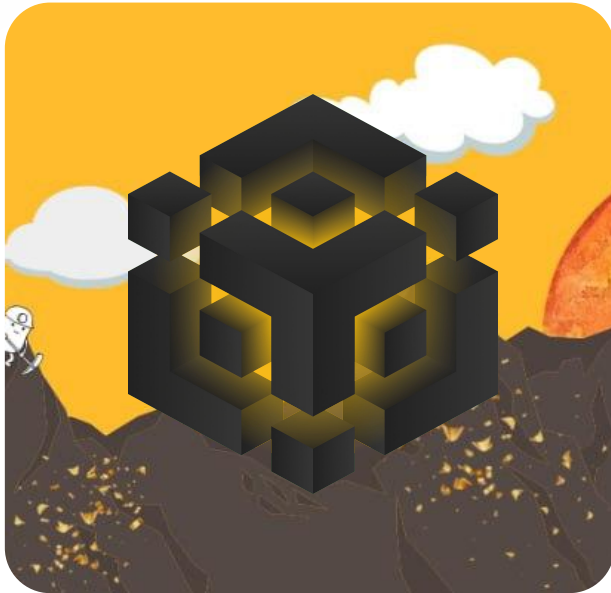

BNB Gold

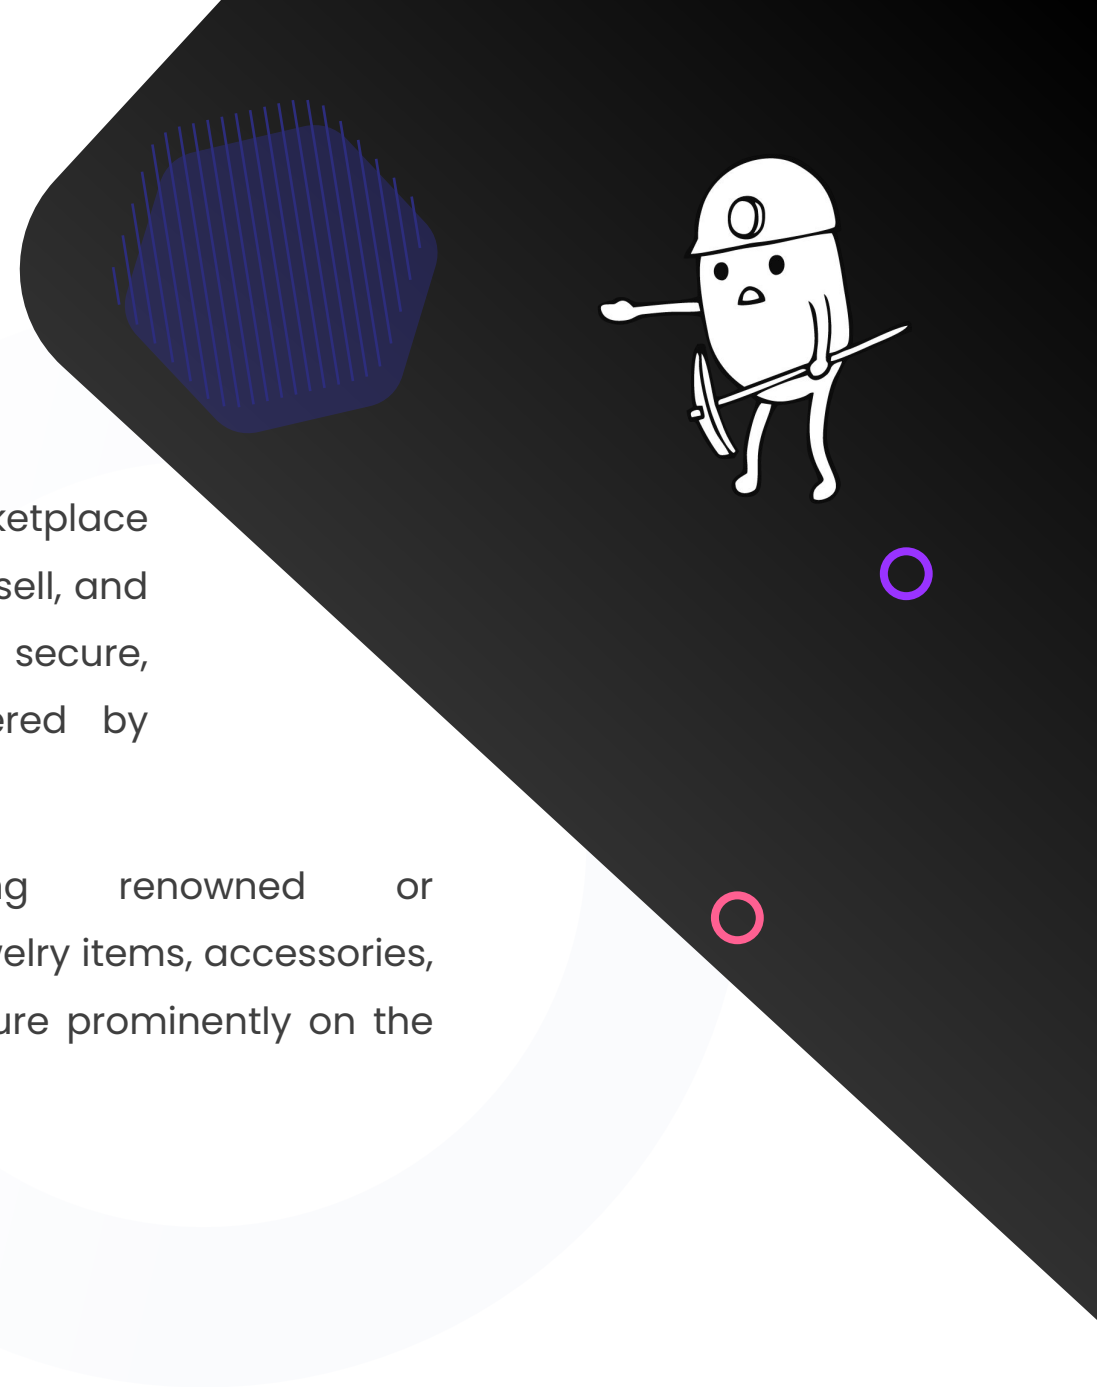

— Token Utility

BNB Gold NFT Marketplace

The gold-themed NFT marketplace provides minting, buy and sell, and transfer activities – all on a secure, integrated platform powered by BNBG.

NFT arts representing renowned or celebrity-endorsed gold jewelry items, accessories, products and arts will feature prominently on the marketplace.

Token Details

Tokenomics

BNBG is a BEP20 token developed on top of the Binance Smart Chain.

Type: BEP-20

Symbol: BNBG

Fixed Supply: 8,888,888,888,888,888 BNBG

Team Allocation: 0%

Token Holders: 3000+

Holder Reward: 1%

Liquidity Pool: 9%

Burned: 50% (4,444,444,444,444,444 BNBG)

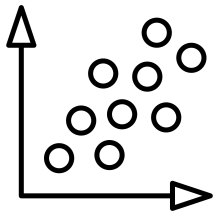

BNB Gold

Tokenomics

BNBG Experimental Tokenomics

1% of every transaction fee will be distributed back to BNB Gold holders. Nothing to stake or claim, just hold it in your wallet. It's that easy!

9% of every transaction fee will be locked in PancakeSwap Liquidity Pool. This Auto LP will create a massive liquidity pool and provide price stability at all stage.

50% of token supply was burned during initial fair launch. Which mean 0.5% of every transaction will burned as well.

June 2021

- ✓ Additional +30% LP lock
- ✓ Twitter account launch
- ✓ Official website launch
- ✓ PooCoin PriceBot
- ✓ Logo & Price feed on TrustWallet
- Social media promotion
- CoinGecko listing
- CoinMarketCap listing
- Token Audit

Q4

May

May 2021

- ✓ Token smart contract launch
- ✓ PancakeSwap Liquidity Pool
- ✓ Major liquidity pool lock
- ✓ Initiate Auto LP function
- ✓ 50% token supply burn
- ✓ Telegram group launch
- ✓ Token fair launch

Q3 & Q4 2021

New Feature & Function

- Additional +20% LP lock
- BNB Goldmine & Staking Website
- BNBG NFT Marketplace
- Listing on Tier 2 exchanges
- Major marketing campaign
- Youtube reviews & marketing
- Listing on Tier 1 exchanges

Roadmap

Our roadmap includes some of our major plans with estimated execution dates.

We Mitigate Risks from the Get Go

GETTING THE RIGHT PEOPLE

We acknowledge that it takes more depth on getting more skillful workforce that have the experience in this market. We are ready to spend on getting all these professionals to work on this project with our in house developers.

THE IMPORTANCE OF SECURITY

Many crypto contract providing platforms have failed due to poor security procedures. Most security breaches could have been prevented by taking simple precautions to protect critical resources.

Leveraging years of experience in the crypto space, our team of developers will develop BNB Gold with security as their top priority. We strive to ensure that we will follow all the industry best practices when it comes to securing infrastructure and data including ISO/IEC 27001:2013 and the Cryptocurrency Security Standard (CCSS).

MARKET COMPETITION

There are probably hundreds, if not thousands of teams planning and even working on dApp and NFT Marketplaces out there. Our goal is to make sure we build our community from the ground up.

Buy BNBG

How to buy BNBG tokens?

1

Make your first crypto transaction

Create a new wallet or import existing wallet. Make sure to store your seed phrase safely.

2

Add BNB on Binance Smart Chain

Buy BNB from the app or transfer from any Central Exchange (e.g. Binance). Make sure it's a BEP20 or Binance Smart Chain (BSC) Network.

3

Go to the dApp Browser Page

Find PancakeSwap in the dApp browser menu or paste the following URL into the URL bar: <https://pancakeswap.finance>

3

Insert BNBG token contract address in PancakeSwap

Paste the following BNBG token contract address in the swap field to make it visible in your token list: `0x6509c95B1AC498390e40eb49e2248c441e78da15`

5

Offset the fee with a 10% slippage

You can use lower slippage to swap BNBG. To do so, change the last four (4) digits of your BNBG amount from 0000 to 1111.
